06

App Download

Search for "KalayLightCam" on Google Play or App Store and download it to your mobile device.

Or scan the below QR Code to download the app:

Android

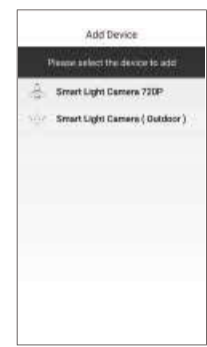

iOS

Compatible Mobile Operating Systems:
For iPhone: iOS 9 or above
For Android: Android 4.4 or above

07

Add Device on Android / iOS

1. To add the device, open the KalayLightCam app and tap **+** button.

2. Select "Smart Light Camera - Outdoor"

08

Add Device on Android / iOS

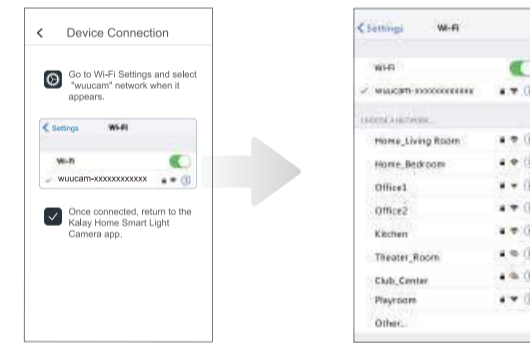

3. Tap to select the appropriate LED Indicator Light status you see on the device.

LED Indicator Light - Wi-Fi Status:

Flashing Blue Light: Device in AP mode and is not connected the internet (go to step 3.1)
Solid Blue Light: Device connected to the internet (go to step 3.2)

09

Add Device on iOS

- 3.1 If your device is not connected to Wi-Fi, go to iPhone Settings then go to Wi-Fi and select "wuucam" to connect your mobile to the device.

Note: Device Wi-Fi: wuucam:***** / Password: 12345678

Once connected to the device, return to KalayLightCam app and follow on-screen instructions

10

Add Device on Android / iOS

- 3.2 If your device is already connected to Wi-Fi, follow the steps on screen to locate and setup a device.

- Option 1: Scan QR Code
Scan the QR code located at the base of the device, App "Share this Device" or the QR Code tag

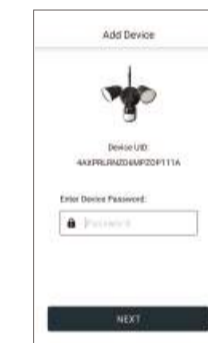

- Option 2: LAN Search
Select the Device UID that is associated with your device, which is attached on a card tag with the device

Note: To add the device to your mobile, please make sure you are connected to the same Wi-Fi network as the device.

11

Add Device on Android / iOS

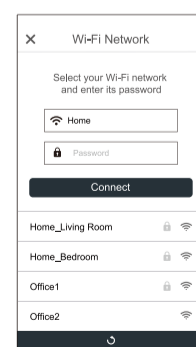

4. When the device has been detected, enter the password, and tap "Next" to proceed.

Note: The default password for an out-of-box device is 888888. If you forget your password, press and hold the reset button for about 8 seconds until the indicator light starts flashing red to restore factory settings.

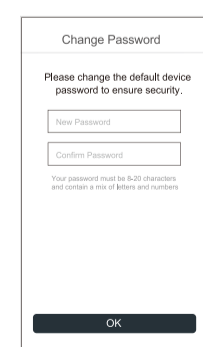

12

Add Device on Android / iOS

Follow the next couple of steps on-screen if you are adding an out-of-box device or a device that has been reset.

5. Setup Wi-Fi Network
A list of nearby Wi-Fi networks will appear. Select your Wi-Fi network from the list and enter the password.

6. Update Device Password
Enter a new password to complete setup. For security reasons, it is recommended that you change your password regularly.

Note: To change the Wi-Fi network connected to the device, press and hold the reset button for approximately 3 seconds or until the indicator light starts flashing blue.

13

Add Device on Android / iOS

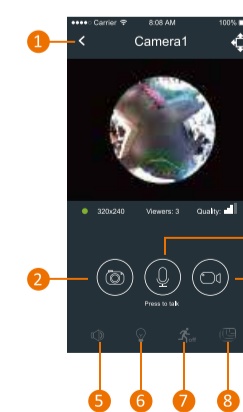

7. Name your device and tap "Go to device list" to return to the dashboard.

8. The dashboard screen will appear after setup has finished.

14

Live View

1. Go Back
2. Snapshot
3. Talk Function
4. Record Video
5. Mute Speaker
6. Smart Lighting
7. PIR Sensor
8. Video Quality

15
