App Download & Installation

- Make sure your device is connnected with Wi-Fi.
- The camera is compatible with Wi-Fi 2.4 GHz only, but NOT 5.0 GHz
- The camera does NOT work with the public network needed to be authorized on website.

1. For quick installation, please scan the QR code (shown below) to download and install "ZeboraCam". Then select the right App for your device (iOS or Android).

< Back   ZeboraCam

Please select an App.

Download Android APK and direct install

Install from Google play

IPhone/IPad AppStore

2. You can also download "ZeboraCam" App from Play Store （Android) or Apple Store (iOS).

3. The "ZeboraCam" is also available for download from our website: www.zeboragroup.com at download center.

Camera Setup

● To set up the camera, please click the tap of "Add Camera" at the bottom of the App. The setup wizard is clearly instructed. Follow the steps to add your new camera to device list. If you have more questions, please click "Help" or "?" at the top right corner to get more assistances.

> ➢ Add New Camera

Select "Add New Camera" when you start to set up a new camera (or after reset). Two ways of setup are available for you: by cable or by wireless (Refer to page 4 & 5). Please add camera one by one if you have multiple cameras.

> ➢ Add Online Camera

Once your camera has connected to Wi-Fi (Online), you must select "Add Online Camera" to add the online camera to your other devices (Refer to page 6).

● You Must Reset Camera if :

> ➢ the camera setup fails,
> ➢ or you change router settings or forget camera password.

Camera reset will restore the camera to factory settings. Please use a pin to press and hold reset button (Located at the bottom of camera) for ~10 sec until you hear beep sound from camera. Then reconnect after the camera finished the self-testing (Moving).

Add New Camera

1. Add Camera by Cable

Step 1. Power on the camera, then connect the camera to router using Ethernet cable. Scan the camera QR code(At the bottom of camera) to acquire camera ID.

Camera ID [   ]

Scan

ⓘ About ZeboraCam   ❯

@ Contact Us   ❯

Q: After Using the Cable Connection, I Unplug the Cable, But the Camera Show Offline?

A: Please wait about 20 Seconds after you unplug the cable, to allow the camera for self-testing, then it will show online.

Troubleshootings

Q: How Can I Reset My Camera?

A: 1.The reset button is located at the bottom of camera.
2. Please use a pin/pencil to lightly press (you will hear a "click" sound) and hold for about 10 Sec until you hear a clear sound "Dong…", then the reset is done.
3. After reset, the camera will recover its manufacture setup, you can use reset if you fail connection, forget your password…

Q. What is SD Card Required for Recording? Why I Can't Use My Micro SD Card for Recording?

A.The camera supports up to 64 GB micro SD card. You Must format the SD card following the Format instruction. If a SD card is not recognized when inserted into camera, please remove and insert again.

Q: How Can I Set up the Night Vision?

A: Please refer to Settings>>IR-LED Settings to set up. Or you can click the IR light located on the live video

Q: Do I have to constantly have my phone connected to the camera in order for the alarms to work? Or do I set it up once and disconnect?

A:You don't need to connect the phone to the camera all the time, just need to have the app run in the background, you could still receive alarms
